COMPLETE DESIGN SERVICE:

High Quality and Efficient Solutions that Reap Benefits

Gartner offers complete design services, including load analysis, equipment selection and energy efficiency calculations. Our engineering staff can develop estimated cost and payback scenarios to quickly determine the most cost effective solution.

Too often a customer thinks he is comparing apples with apples when the equipment list from two different contractors is the same. The way the equipment is controlled and piped is critically important to the operation. **This is a detail that is often missed.** Gartner uses computerized piping analysis programs to properly size the piping.

We use the latest control innovations to provide a state of the art installation. And Gartner is well versed on the latest energy-efficient technology that can pay for itself in just a few short years.

QuickPen Computerized Estimating – Fast, precise estimating that can save you significant time and money. QuickPen also eliminates the need to start from square one when changes become a factor.

3-D CAD Drafting Systems – To design creative solutions requires the finest in computerized design equipment and the skilled engineers to run it. You'll find both at Gartner. Our 3-D drafting makes the drawings we produce accurate in every dimension, making it easy for our designs to be realized in the field. 3-D drafting is much faster for initial designs, streamlines changes and allows us to find and fix problems **before** they become costly additions to jobs

Latest Technology – Because we stay up to date on the latest control systems compressors and more, you can be certain your new system is designed for today. and not a relic of yesterday.
