### **EXISTING PLANT SURVEYS: Analysis and Planning is Key**

#### **Plant Survey**

Our engineers will travel to your plant and make a complete assessment of your refrigeration system. They will write a "refrigeration road map" that examines what you have now, what you will need, and when you may need it. Long-range planning pays off.

#### **Computerized Analysis**

We've developed our own software to perform many of the detailed calculations necessary to properly size a modern refrigeration system. Using our own software is faster and more accurate. Plus, we can perform "what if" analysis to test several designs and find the most efficient one.
