WHAT'S NEW: SRV Quick Tool

As a service to the ammonia refrigeration industry, Gartner has also developed the **SRV Quick** tool. This is offered free of charge, and is based upon the presentation given by Don Faust at the 2005 IIAR Convention in Acapulco. The **SRV Quick** tool is a great resource for checking the size of a relief valve or checking the size of a vent. It requires Microsoft Excel to run. Download the **[SRVQuick Tool](#)** here.

SRV Quick Update

SRV Quick has been updated to version 2.0 (9/28/2006). Updates include:

1. The ability to specify pipe schedule
2. Choked flow calculations
3. The addition of several new models of relief valve

This is the same version of the SRV Quick program that will be demonstrated at the 2006 RETA convention in Dallas.
